About the Seminar:
Teaching learning process is the real centre of education. It is the bonding element between student and the institution. The final product is more or less depending upon the quality of teaching learning and conducive learning environment in the institute. The skill based education and high competence level on the part of students are in demand in the rapidly changing world economy and globalization. The use of technology (ICT) and new teaching learning methodologies in vogue need to be constantly upgraded. Changing role of resourceful teacher from a mere guide to a facilitator is also another area of focus in the present scenario. The role of IQAC at institutional level under NAAC guidelines is a crucial for bringing about optimistic change in this regard.
