## Dr.m.w.p.w.s.arts and commerce college Question bank for b.com ii sem Teacher name-Vivek s.chavan MEAN, MEDIAN, MODE, STANDARD DEVIATION, SKEWNESS, C.V.

Prob. 1 :- If the mode 32.1 and median 34.3 of moderately asymmetrical series problem mean.
Prob. 2 :- If the value of mode and median of series are 64.2 and 68.6 respectively. Find out the value of mean.

Prob. 3 :- Deterine the Arithmetic Mean in the following series.

| Income Limits | No. of Persons |
| :---: | :---: |
| $100-200$ | 15 |
| $200-300$ | 18 |
| $300-400$ | 30 |
| $400-500$ | 20 |
| $500-600$ | 17 |

Prob. 4 :- Calculate the average marks per students.

| Income Limits | No. of Persons |
| :---: | :---: |
| $10-20$ | 7 |
| $20-30$ | 13 |
| $30-40$ | 20 |
| $40-50$ | 25 |
| $50-60$ | 10 |
| $60-70$ | 8 |
| $70-80$ | 6 |
| $80-90$ | 1 |

Prob. 5 :- Calculate the average marks per students.

| Group | Monthly Income | Weight |
| :--- | :---: | :---: |
| Manager | 1,000 | 1 |
| Office Staff | 200 | 8 |
| Skilled Workers | 250 | 20 |
| Unskilled workers | 140 | 11 |

Prob. 6 :- Calculate weight arithmetic average.

| Price $:$ | 3 | 4 | 5 | 6 | 7 | 8 | 0 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\underline{\text { Sales }}:$ | 16 | 14 | 13 | 17 | 10 | 6 | 4 |

Prob. 7 :- Calculate correct mean when it is kwon that for a group of 10 students scoring an average of 60 marks, the best paper was wrongly marked 80 instead of 75 ?

Prob.7(a) :- Calculate correct mean when it is kwon that for a group of 10 students scoring an average of 60 marks, but two items wrong marked $80 \& 70$ instead of $52 \& 70$.

Prob. 8 :- If mean $=270$ and mode $=310$ in a moderately skewed distribution, there what will be the median value?

Prob. 9 :- If the mode and mean of a moderately asymmetrical series are respective 26 and 20.2 meters. Compute most probable.

Prob. 10 :- Find out the median income from the following;-

$$
\begin{array}{llllllllll}
\text { Income in Rs. } 120 & 200 & 170 & 800 & 620 & 350 & 825 & 375 & 640 & 750
\end{array}
$$

Prob. 11 :- Find out the median size from the following.

| Size | $:$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency $:$ 42 <br> Cumulative $:$ 42 | 25 | 58 | 40 |  |  |

[^0]Prob. 12 :- Calculate the median.

| Profit in Rs. : | $5-10$ | $10-15$ | $15-20$ | $20-25$ | $35-30$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| No. of Shop : | 7 | 12 | 15 | 10 | 3 |

Prob. 13 :- Given mean $=25$, median $=27.3$ find out the approximate value of mode.
Prob. 14 :- If the mean median of series are 26.8 and 27.9 respectively. What would be it most probable mode?

Prob. 15 :- Calculate mode. If the value of mean $=139.51$ and median $=139.84$
Prob. 16 :- Karl Person's co-efficient of skewness of a distribution is ( + ) .32 its standard deviation is 6.5 and mean is 29.4 find out mode.

Prob. 17 :- Find out mode. If $\mathrm{F}_{1}=21 ; \mathrm{F}_{2}=15 ; \mathrm{F}_{0}=21$; model group is 50-60.
Prob. 18 :- Calculate the mode.
Model group is 1200-1600; $\quad$ Frequency of the group 41;
Frequency of previous group 40; Frequency of next group 27.
Prob. 19 :- Find out mode of the following series.

| Size | $:$ | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | $:$ | 5 | 6 | 8 | 7 | 9 | 8 | 9 | 6 |

Prob. 20 :- From the data given below find the model group.

| Age | No. of Persons |
| :--- | :---: |
| $20-25$ | 50 |
| $25-30$ | 70 |
| $30-35$ | 80 |
| $35-40$ | 180 |
| $40-45$ | 150 |
| $45-50$ | 120 |
| $50-55$ | 70 |
| $55-60$ | 50 |

Prob. 21 :- Find model group from the following.

| Income in Rs. | No. of Workers |
| :--- | :---: |
| Below 400 | 4 |
| Below 800 | 16 |
| Below 1200 | 56 |
| Below 1600 | 97 |
| Below 2000 | 124 |
| Below 2400 | 137 |
| Below 2800 | 146 |
| Below 3200 | 150 |

Prob. 22 :- Calculate standard deviation from the following data.

| Income in Rs. | 2542 | 2522 | 2534 | 2532 | 2545 |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  | 2566 | 2550 | 2530. |  |  |

Prob. 23 :- Find out standard deviation.

$$
\begin{array}{llllllllll}
120 & 110 & 115 & 122 & 126 & 140 & 125 & 121 & 120 & 131 .
\end{array}
$$

Prob. 24 :- Calculate standard deviation.

| Size | $:$ | 10 | 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\underline{\text { Frequency }}$ | $:$ | 5 | 7 | 10 | 11 | 15 | 12 | 6 | 3 | 1 |

Prob. 25 :- Calculate the standard deviation from the following data.

| Marks | $:$ | 20 | 22 | 24 | 26 | 28 | 30 | 32 | 34 | 36. |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\underline{\text { No. of Student: }}$ | 9 | 13 | 19 | 22 | 24 | 21 | 18 | 14 | 10 |  |

Prob. 26 :- Calculate standard deviation.

| Marks | $:$ | $10-25$ | $25-40$ | $40-55$ | $55-70$ | $70-85$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No. of Student: | 6 | 21 | 44 | 27 | 4 |  |

Prob. 27 :- Calculate standard deviation from the data given below ;-

| Age | $:$ | $5-7$ | $8-10$ | $11-13$ | $14-16$ | $17-19$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No. of Student: | 7 | 12 | 19 | 10 | 2 |  |

Prob. 28 :- Given : Co-efficient of skewness $=-0.4 ;$ Mean $=45 ;$ Median $=48$.
Find out standard deviation.

Prob. 29 :- Calculate standard deviation.
$\mathrm{N}=230$
Total of frequency into deviation from assumed mean $=-105$
Total of deviation square from assumed mean $=733$
Step deviation $=10$

Prob. 30 :- Compute Co-efficient of skewness from the following data.

$$
\mathrm{M}=18.8 ; \quad \mathrm{Q}_{1}=14.6 ; \quad \mathrm{Q}_{3}=25.2
$$

Prob. 31 :- Find the co-efficient of skewness if difference of the two Quartile $=8$ and sum of two quartiles $=22$ and median $=10.5$

Prob. 32 :- For a certain frequency distribution. Lower quartile $=8$; Upper quartile $=10 ;$ Median $=9$ Calculate the co-efficient of skewness.

Prob. 33 :- Calculate co-efficient of skewness from the following data.

| Arithmetic average $=56.8 ;$ | Median $=59.5 ;$ |
| :--- | :--- |
| Standard deviation $=14.4$ |  |

Prob. 34 :- From the following data find out Karl Pearson's co-efficient of skewness.

| Measurement: | 10 | 11 | 12 | 13 | 14 | 15 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency : | 2 | 4 | 10 | 8 | 5 | 1 |

Prob. 35 :- Find out which batsman is more consistent in this performance.

|  | Batsman 'A' |  |  |  | Batsman 'B' |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Arithmetic average : | 46 | 50 |  |  |  |
| Standard deviation : | 25.5 |  |  |  |  |

Prob. 36 :- Compare the consistence in the following cases.

|  |  | $\underline{\text { Mean }}$ | $\underline{\text { S.D. }}$ |
| :--- | :--- | ---: | ---: |
| Share 'A' | $:$ | 321.63 | 7.43 |
| Share 'B' | $:$ | 2540.12 | 13.89 |

Prob. 37 :- Which group is more uniform in Character?

| Group 'A' | Group 'B' |
| :---: | :---: |
| Mean $=20$ | Mean $=18$ |
| S.D. $=14$ | S.D. $=12$ |

Prob. 38 :- Which group is more Variable?

|  | Group 'A' | Group 'B' |
| :--- | :---: | ---: |
| Mean : | 60 | 54.6 |
| S.D. : | 18.75 | 13.68 |

Prob. 39 :- Which group is more Variable?

| Group 'A' | Group 'B' <br> Mean $=24$ |
| :---: | ---: |
| Variance $=100$ | Variance $=20$ |

Prob. 40 :- Which of the two group is more consistent?

|  |  | Group 'A' |  |
| :--- | :--- | :---: | :---: |
| Mroup 'B' |  |  |  |
| Mean : | 30 | 25 |  |
| Variance : | 625 | 400 |  |

Prob. 41 :- Find out C.V.....

$$
=\quad 3.5 ; \mathrm{n}=10 ; \quad \mathrm{Em}=145
$$

Prob. 42 :- From some financial statistic, it is found that the monthly average electricity charges was Rs.2,460 and standard deviation Rs.120. The monthly average direct wages was Rs. 42,000 and standard deviation Rs.1200. State which is more variable with proper reason.

$$
* * * * *
$$

Prob. 43 :- Calculate the Semi-inter quartile range and it's Co-efficient.

$$
\mathrm{Q}_{1} \quad=28.04 ; \quad \mathrm{Q}_{3}=47.16
$$

Prob. 44 :- Calculate Quartile deviation and it's co-efficient.

$$
\text { When } \mathrm{Q}_{1}=157 \text { and } \mathrm{Q}_{3}=165
$$

Prob. 45 :- Calculate the Semi-inter quartile range and it's Co-efficient.

$$
\mathrm{Q}_{1} \quad=45.43 ; \quad \mathrm{Q}_{3} \quad=64.09
$$

Prob. 46 :- Calculate the Semi-inter quartile range and it's Co-efficient.

$$
\mathrm{Q}_{1}=68.15 ; \quad \mathrm{Q}_{3} \quad=96.13
$$

Prob. 47 :- With the help of following information calculate Quartile Deviation as well as the co-efficient of skewness.

| Median | $=18.8$ |
| :--- | :--- | :--- |
| Lower Quartile | $=14.5$ |
| Upper Quartile | $=24.92$ |

Prob. 48 :- Calculate Quartile Deviation and it's co-efficient.
First Quartile $=113.8$ and Upper Quartile $=179.4$

Prob. 49 :- From the price of share of Sanjeewan Company and Rahul Company. Find out co-efficient of Quartile deviation.

| Sanjeewan Company | Rahul Company |
| :--- | :--- |
| Lower Quartile $=50.75$ | Lower Quartile $=103.75$ |
| Upper Quartile $=55.25$ | Upper Quartile $=107.00$ |

Prob. 50 :- Calculate Quartile deviation from the following data.

| Age in years : | 15 | 16 | 17 | 18 | 19 | 20 | 21 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No.of Students: | 4 | 6 | 10 | 15 | 12 | 9 | 4 |

Prob. 51 :- Calculate the Semi-inter quartile range and co-efficient of Quartile Deviation.

| Height in c.m. : | 153, | 155, | 157, | 159, | 161, | 162, | 165, | 167, | 169. |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No.of Students: | 25, | 21, | 28, | 20, | 18, | 24, | 22, | 18, | 23. |

Prob. 52 :- Calculate the co-efficient Quartile deviation of the marks of 59 students in Economics as given below, and it's co-efficient.

| Marks Group | No. of Students |
| :---: | :---: |
| $1-10$ | 4 |
| $10-20$ | 8 |
| $20-30$ | 11 |
| $30-40$ | 15 |
| $40-50$ | 12 |
| $50-60$ | 6 |
| $60-70$ | 3 |

Prob. 53 :- From the following table compute the quartile deviation.

| Size: | 4 <br> to | 8 <br> to <br> 8 | 12 <br> to <br> 12 | 16 <br> to <br> 20 | 20 <br> to <br> 24 | 24 <br> to <br> 28 | 28 <br> to <br> 32 | 32 <br> to <br> 36 | 36 <br> to <br> 40 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency : | 6 | 10 | 18 | 30 | 15 | 12 | 10 | 6 | 2 |

Prob. 54 :- Bowley Co-efficient of Skewness is $-.36 ; \mathrm{Q}_{1}=8.6$ and Median $=12.3$
Find out upper quartile.

Prob. 55 :- For the distribution of Bowleys Co-efficient of Skewness is $-.36 ; \mathrm{Q}_{1}=8.6$ and Median $=12.3$ What is the co-efficient of quartile deviation?

[^0]:    Frequency
